Czerwie have their style, marked by the unconventional use of instruments and musical values, they combine genres and conventions, sometimes they are sad, sometimes cheerful. They have six albums in their discography, and as you know, six means positive vibrations and the gift of opening hearts.

The group is made up of six musicians, fluent in percussion, xylophone, bass, guitar, mandolin, accordion, synthesizers, trumpet and saxophone. Plus ethnic instruments - mainly percussion - whose names are difficult to pronounce or remember.

Of course, there is also male singing, because the band is made up entirely of men, whose names say everything about the qualities of their souls: Wojtek, Maciek, Paweł, Piotrek, Michał and Tadek.
